III. MULTIPLE APPLICATIONS:

Multiple flat rate projects shall be calculated at 100% for the highest fee and 50% of each additional fee for the same project on the same property. All cost accounting project or projects shall be calculated cumulatively.

IV. ROUNDING TOTALS:

Total calculated fees due to be rounded off to the nearest dollar.

V. COST ACCOUNTING

The County wishes to recover the full cost of service for major projects. If the Planning Director is of the opinion that the processing cost of an application or administering the conditions of approval will be substantially in excess of the maximum charge, he may notify the applicant at the time of application that the total processing cost will be determined by cost-accounting techniques and that additional charges may be forthcoming.

In calculating fees, the environmental review fee (including noticing and appropriate Commission or Board considerations) shall be added to all basic application rates. The basic rates for all cost plus projects shall also be increased based on an estimate of staff time necessary to complete a review of the application.

VI. REFUNDS

A refund of any portion of fees for withdrawn or partially completed

projects shall be determined by the Planning Director, based on code requirements and/or his appraisal of the cost of staff work. In addition, refunds will be made on all projects required to be cost-accounted if the final costs of processing end up being less than any initial fees of deposits received.

VII. WAIVER PROVISIONS

The Board of Supervisors may consider waivers of application fees upon the filing of a written request. A waiver may be granted in situations which the Board of Supervisors consider equitable and in the public interest (health and safety).

VII. PUBLIC AGENCY EXCEPTION

No fees shall be charged for materials (one copy each) provided to public agencies where said public agencies are conducting studies, programs, etc., which benefit County residents. The public agency shall complete an order/billing form with a brief description as to what purpose said materials are needed.
